WASHINGTON NEWS AND GOSSIP

The Georgia Bill has gone from the House, this time in a very simple and direct form. The first section declares the State entitled to representation, but the act shall not be held to prevent the people from holding an election for members in the process of the p

of the legislature in accordance with the provisions of their constitution. The second section merely gives the Governors of Georgia, Virginia, Texas and Mississip it he same right the Governors of other States have to organize the militia. There are no conditions whatever in the bill, Mr. Lawrence's amendment imposing the same getting but about 40 votes. Whitely (for the term ending March 4, 1871), Foster Blodgett (for the term commencing at that date), and H. P. Farron (for the term ending March 4, 1873), elected in February last, after the State government had been a second time reconstructed. During the Fortieth Coagress, although the Senate refused to admit Messrs, Hill and Miller to sents, the House did admit those who claimed to be elected, and they retained their seats until the end of the term. Claiming to have been elected also for the full term succeeding, they applied for admission to the Forty-first Congress and were refused. It is probable that they will again present their To the Wheeling Intelligence.

For a background to this interesting bit of landscape we have the bold outline of Cheat Mountain, along which the cyo in voluntarily follows as it stretches away to the South, suggesting pleasant thoughts they are in doubt. Its leading opponents have canvassed the situation very carefully, and feel entirely confident that there are thirty or thirty-one who will not vote for it. One of the documents broughtout in the investigation already tells against the treaty among the confident of the constitution of white the constitution of the constitutio

The most conspicuous object which strikes the eye, is the new University building, located on an elevated knoll north of the town, and which which comnorth of the town, and which which com-munds a most pictureaque view of the river, town and adjacent country, with the mountains in the distance. The build-ing was commenced in the autumn of 1868, and has just been completed. In its architecture, and in its admirable advanarchitecture, and in its admirable adap-tation to the purposes of the University, it is a credit to to the State. The greatest care and economy have been devoted to its construction, under the faithful superin-tendence of the resident Regent, Geo. M. Grant, President of the United States promises privately to use all his influeire in order that the lider of annexing the Dominican Republic to the United States, may acquire such a degree of popularity among members of Congress as will be necessary for its accomplishment, and he offers to make no communication to that body on the subject until he shall be certain that it will be approved by a majority. There is no great difficulty in understanding what this means, and it is hardly necessary to put into plain English the idea there veiled under diplomatic language. After reading the article it is easy enough to see one reason for the President's urgency with respect to the treaty, even it it fails to secure the necessary yote for ratification: the content of the chasses, nor at the content of the literary Societies. Chinese Lanon.—There seems to be a good deal of misunderstanding through the country about the Chinese labor bill pending in the Senate. There has been some very foolish and extravagant talk on it, but the bill listel is a good one. The custom in California is to bring over large loads of Chinamen on three or four year contracts, and take what is substantially a mortgage on their families for the repayment of the outfit and cost of passage. These Chinese are then hired out at the best figures that can be obtained, a small per centage of each man's wages going to him, and the rest going to the contractors who bring them over. Light at Last.

Light has at last come to the World or the negro question. That journal printed yesterday the strongest defense of the Re-publican party that has yet been pub-lished. When we recollect the predictions of Democratic newspapers, orati and conventions for the last ten years, the article in question is all the more rearticle in question is all the more remarkable. The "war was a failure," "th Union could not be restored," emancipe tion would lead to a war of races," "the dusky hordes would overrun the North," "the negroes would never work"—these are only a few of the lugulrious prophe ies which had been uttered to alarm and terrify us before the close of the war, But now the journal which, in that way, sought to frighten timid people ac-knowledges that it has been groping in darkness during these long years, and that it has at last found truth and light and wisdom.

We are now told that the war is We are now told that the war is not a failure, and that emancipation, fraught with so many horrors, "is not regarded as an evil by the owners of the Southern plantations." And it is especially interesting to know that this verdict is given on the evidence of the "best classes of the South." Again the best classes say, and the World indorses it, that the negroes are "reasonably industrious." In other words, the black man works as well of his own free will as he did when Southern words, the blace and works as Southern gentlemen of the better class cracked a whip over his shoulders, and gave him forty lashes three times per week. We forty lashes three times per week. We are further informed that the "negroes are ontent, and that the planters apprehend to trouble." So all the stories about mid-night assassination and robbery dissolve into thin air. The "labor problem has been satisfactorily settled," we are as-sured; nay, more, that "the planters will make larger profits under the new systen than they did under the lold."
Here we have positive good. King
Cotton is not to be dethroned; the rich
plantations of the South will not become
a wilderness, but will become more pro-

d widerness, and with ductive than ever. After all, the "howling fanatics" of New England, "Abe Lincoln and his myrnidons," have brought some blessings to the Southern land. The South is to blossom like the rose in the South is to blossom like the rose in the future. There is to be peace and contentment and happiness, and all because of the march of the Yankee soldier and the "iron rule of the oppressor." But the World, on the authority of the gentlemen of the "better class," gives us still more in-teresting and valuable information and sees more substantial good in the proch-

mation of emancipation and the recon-struction laws. In a consolatory sort of a way it says: "When a negro dies it does not entail a loss of fifteen hundred dollars on the owner of the plantation." good cliunk of solid comfort and substan-

agood chink of solid comfort and sols altid gain!

In addition to all this it is stated by the World that the colored people, so far from being a lazy, thriffless, vagabond set, "work with alacrity," and that "the industrial portion of the experiment is working to the satisfaction of all concerned." No Freedmen's Bureau is necessary to protect "ignorant Cuffee." In fact, he is able to take care of himself in a manner lo protect "ignorant. Cuffee." In fact, he is able to take care of himself in a manner entirely satisfactory to the great organ of the Democratic party. The World prophets have been false prophets after all; there is to be peace and happiness and plenty, instead of war and revolution and finnine. The "Lost Cause" is lost indeed, for the new South is to be greater and more prosperous than ever. The thirteenth suiendivent to the Constitution is a blessing in perois tinn ever. The introduction is a blessing in-deed, and the Republic on the "corner-stone, of Freedom, proves to be stronger, more enduring and more prosperous than the so-called Republic of Slavery on the

NO. 264.

NEW YORK, June 27.

Wall street and the markets are maetited and depressed by telegrams from Washington. The latest report was that the Conference Committee on Garfield's currency bill sgreed to the new bill the main features of which were the Issuing of \$45,000,000 additional bank currency: the retire ment of \$45,000,000 3 per cent certificates; the redistribution of \$25,000,000 national bank circu lation, and probable free banking on a gold re serve. This has caused a general deline in price and an increased pressure to sell in all markets Monky-Easy at \$25 per cent.

New York Dry Goods Market.

Naw York, June 37.

Business is extremely dull, and prices of heavy brown sheetings are broken down badly, in sympathy with the reduction stready noticed in one or two brands. We quote Atlantic Ast 14c, and Indian Head at 14c, being a decline of 1c; Lyman E is down to 18c; white Appleton A is offered at 13c; Amoskesg A do, do.; Stark A, Wachu sett, Pacific Extra and Great Falls Kat 133c; Clark's sheetings are held at 14c, and August 13c. If cotton were to falls 6 cents per pound, 1 is doubtful if these goods could be made to para profit at the above rates; and hence we loof for a reaction in prices, with strong probability of some rampant speculation at once.
